Safe & Comfortable Swimming Lessons

Swimming - An Important Life Skill

Swimming is an important life skill, one that we think should be taught at a young, tender age. "Why?" you may ask. Well, how much time do you have? Because we can go on and on, all day long, about the importance of teaching your kids to swim. But allow us to provide you with a brief summary of the benefits of swimming for children.

For one, swimming skills save lives, especially because children tend

to be easily attracted to water. Swimming also promotes health and well-being, both physically and mentally. It keeps the body healthy and the mind stimulated - crucial for a growing child. In addition, swimming builds and nurtures self-confidence. Last but not least, swimming is fun!

Aqua-Tots Swim Schools, Making Swimming Lessons Safe, Comfortable & Fun

Established in the US in 1991, Aqua-Tots Swim Schools is among the

pioneers in childhood swimming instruction. Founded based on a dream to teach children to swim and develop a love for swimming and the water along the way, Aqua-Tots took off and has never looked back since!

Today, Aqua-Tots has more than 100 campuses, spanning 14 countries and 4 continents. In 2021, Aqua-Tots Swim Schools welcomed its newest member to the big family at Tay Ho, Hanoi, Vietnam.

Like all its other siblings around the world, Aqua-Tots Swim Schools Tay Ho adheres to the strict standards and requirements of a swimming school. Equipped with a modern sand-filtration-technology circulating water filtration system and advanced heating technology, Aqua-Tots Tay Ho becomes one of the handful swimming schools in Vietnam where water quality meets safety standards, even for the sensitive skin of infants.

Waterco’s Role in Collaboration with Aqua-Tots Tay Ho

As part of preserving the best water quality for its students and instructors, one important criterion for Aqua-Tots Tay Ho would be the water temperature.

Too warm of a temperature, the pool might become a breeding ground for bacteria and algae growth. It can also affect the pool chemistry (e.g., pH), not to mention it would not be comfortable to swim if the water sends out a scorching sensation. Likewise, too cold of a temperature would cause health issues for swimmers just the same, including lack of breathing control, shock and pain, among others.

Therefore, while keeping a suitable pool temperature may seem to be a minute issue among many other important pool operations, it is just as essential and delicate, nonetheless.

In this regard, Aqua-Tots seek the services of Minh Phuc Company Limited, Waterco’s authorised dealer in Vietnam. Aqua-Tots required a reliable pool heating system capable of maintaining a comfortable 28-31°C water temperature. And for this requirement, Minh Phuc recommended Waterco’s Electroheat Plus Heat Pump.

Waterco Solution in detail:

- ❖ 4 units of Electroheat Plus 44kW Heat Pumps, dedicated for Aqua-Tots’ pool heating needs.
- ❖ Since heat pumps utilise ambient air as their heating energy source, they are designed for outdoor installation, as shown in the photo beside.
- ❖ Electroheat Plus comes in a weatherproof cabinet, so outdoor conditions are not an issue at all.

- ❖ It is energy-efficient, using merely a fraction of the energy to generate the same amount of heat compared to other heating solutions like gas or electric heaters.
- ❖ It uses R410A refrigerant, making it ozone-friendly while maximising performance.

Conclusion: A Warm Pool, A Satisfied Pool Management Team, A Bunch of Happy Students and Instructors

By leaving the pool heating to Waterco’s heat pumps, Aqua-Tots and its instructors can focus on what they do best – pass along the swimming skill to young ones and spread the love for the water. Students and Instructors alike can now enjoy all-year-round soothing and safe swimming lessons. A reduced operation cost, an impressive efficiency gain, and a long-lasting heating solution – those are the cherry on top!
