Spa and wellness industry relies on Waterco's premium commercial water filtration equipment

Wellness has become a major force in the global tourism market and destinations offering premium aquatic facilities are a large drawcard for travellers.

Research released last year from non-profit the Global Wellness Institute (GWI)¹ revealed that the wellness economy reached a whopping \$5.6 trillion in 2022. It also revealed that the \$819.4 billion wellness trips taken (both internationally and domestically) that same year represented 7.8 per cent of all tourism trips — a significantly larger share of the market than the previous decade.

In the midst of this, London has become a health and fitness hotspot. This new tier of specialist clinics and curated spaces installing Waterco's water filtration and sanitisation innovations provide best-in-class pool and spa experiences while significantly reducing energy and water consumption.

The preferred choice for swimming pool and spa builders around the world

Savvy operators like [Third Space](#) — one of London's premium members-only health clubs — understand that world-class wellness sanctuaries rely on water for their pool and spa treatments.

“Third Space is more than a gym — it's a sanctuary for health enthusiasts, a hub for community engagement, and a haven for those seeking holistic wellness,” explains Waterco Europe CEO Tony Fisher. “With its sleek design, state-of-the-art facilities, and innovative approach to fitness, Third Space's location in Wimbledon has quickly become a beacon for individuals striving to elevate their wellbeing in both body and mind.”

Designed by Essex-based [Aquascapes](#) — recipients of multiple UK Pool and Spa Awards — Wimbledon's state-of-the-art aquatic facilities depend on the most reliable water filtration equipment in the market: [Waterco](#).

“As a prestigious health club in the heart of Wimbledon, the equipment had to be of the highest quality, which is why Waterco was the preferred choice for Aquascapes,” he explains.

Guided by RIBA — the Royal Institute of British Architects' definitive model for the design and construction process — Aquascapes worked from an empty shell in what was a former department store to a finished club.

“The project included the swimming pool, hydrotherapy pool, cold plunge pool, steam rooms, Loyly sauna, Finnish sauna, and luxury finishes, to name a few,” says Fisher.

Designed for recovery, the facility's 6.3m³ Cold Plunge Pool allows members to complement their fitness routines with the benefits of cold water immersion.

Main swimming pool

Volume: 240 m³

Purpose: Semi-Olympic size for trainers and athletes

Waterco equipment: 5 x 900mm SMDD Filters, 5 x Hydrostar MK4 Commercial Pumps, 5 x Pump Variable Frequency Drives, 3 x MC16 MultiCyclones

The 25m metre, 240 m³ swimming pool relies on Waterco's proprietary fibreglass filters, Hydrostar commercial-grade pumps, and water-saving MultiCyclone centrifugal filters to maintain premium water quality.

A bank of SMDD commercial filters ensuring the very highest quality in filtration

Hydro pool

Volume: 40 m³

Purpose: Relaxation and recovery

Features: 2 x air beds, 12 x massage stations consisting of 12 air and water effects, 1 x waterfall, 3 x bubble seats and 3 x neck massages

Waterco equipment: 2 x 1200mm SMDD Filters, 2 x Hydrostar MK4 Commercial Pumps, 2 x Pump Variable Frequency Drives and 2 x MC16 MultiCyclones

Third Space's 15-person Hydropool features underwater massage jets, neck massage, lie down massage jets, and a silk flow hydrotherapy waterfall massage.

Cold plunge pool

Volume: 6.3m³

Purpose: Recovery

Waterco equipment: 1 x 1200mm SMDD Filter, 2 x Hydrostar MK4 Commercial Pumps, 2 x Pump Variable Frequency Drives and 1 x MC16 MultiCyclones

Aquascapes regarding both the supply and quality of their products.

"It's not surprising that Waterco is the preferred choice for swimming pool and spa builders around the world," says Fisher. "From resort-style hotels pools to luxury spa destinations, Waterco's water treatment and sanitisation innovations provide peace of mind for customers, facility managers, developers, and investors."

With over 40 years of global experience in manufacturing and supplying commercial equipment for various applications, Waterco instilled full confidence in

Why Waterco for the Spa and Wellness industry?

Waterco is an established, international manufacturer and supplier of water treatment solutions with more than 40 years' experience in the pool and spa industry. From water saving pre-filtration devices to hydraulically efficient pumps, equipment is engineered to not only maintain premium water quality for guests and members but also reduce operational costs for facilities.

Micron SMDD Side Mount Deep Bed Filters

Manufactured from high-grade, non-corrosive materials and employing the latest in proprietary winding technology, Waterco's Micron commercial range features continuous strands of fibreglass filament that create vessels with refined consistency and superior quality. [Read more here.](#)

Hydrostar MK3 + MK4

Engineered with an innovative quarter lid and lock ring, and extra-large strainer basket, the Hydrostar is purpose-built for commercial sized swimming pools. Features include improved hydraulic efficiency with an internal volute, 90mm/3" quick connect unions, 6-litre strainer basket and secondary seal motor protection. [Read more here.](#)

MultiCyclone MC16

Waterco's multi-award-winning, Climate Care Certified pre-filtration MultiCyclone works on the basis of centrifugal water filtration and is designed with no moving parts and no filter media to clean or replace. [Read more here.](#)
